Swiss BI-Day

2014 was the launch year of the annual Swiss BI Day event and the related presentation of the Swiss BI Award. October 6th 2015 the second edition will be held.

As the name suggests, the Swiss BI Day event focuses on professionals from Switzerland. Its target group is professionals in the fields of Data Warehousing and Business Intelligence, information managers and IT managers as well as everyone who wants to know more about what is happening in the world of data and information.

The aim of Swiss BI Day is to give participants the opportunity to share knowledge and more specifically, to network; to establish new contacts and revitalize existing ones.

Moreover, Swiss BI Day is the occasion on which the Swiss BI Award is presented to the best BI project that has been set up and implemented. An expert jury assesses the submitted projects and announces the winner.

Swiss BI Day is proud to present a host of speakers from at home and abroad. Based on the outcomes of a survey on LinkedIn, we have decided on a broad spectrum of speakers and topics.

Swiss BI-Award 2015

Purpose of the award

The 2nd Swiss BI Awards event will be presented on Swiss BI Day in 2015. The Swiss BI Award will go to the most successful BI project of 2014, according to the criteria and the decision of the jury. Any organization in Switzerland can submit a nomination for the Swiss BI Award.

This year, two trophies will be awarded. One for the most successful BI Back-End Project, and one for the most successful BI Front-End project.

The jury will consist of experts from the academic world, the media and the business community.

Process

1. The BI Award Board will appoint an independent jury, with a background in business, media and academic education.
2. Anyone can nominate a project for the award, substantiated in writing (1-2 A4 pages).
3. The jury will assess the motivations and collect additional information if desired.
4. The jury will choose three projects from the nominations which will be announced a few weeks before the BI Day. Each project team will receive a free ticket for the BI Day.
5. The jury will recommend 1 winner to the Board which will officially ratify that choice.
6. The award will be presented to the winner at the BI Day.

Evaluation criteria

1. Innovation in applying BI ideas and concepts in the organization
2. Success of the BI solution from the user perspective
3. Quality of the BI solution (architecture and implementation)
4. Demonstrated benefits and impact

BI Award Back-End

The jury will only evaluate the back-end part of the project.

The back end part includes the Extraction process, the Data Integration process, The Data Quality process if any, The Data Warehouse model, the Data Warehouse architecture and Infrastructure.

The Monitoring process, the Master Data Management process and other architectural layers of the solutions will also taken into account if any.

The presentation layer of the Data Warehouse, including the Semantic layer if any, are also important parts of the back-end architecture. The chosen Data Model of this layer will also be judged.

Bi Award Front-End

The jury will only evaluate the Front-end part of the project.

The front-end part is the way the user can access their data.

The jury will judge the general design of the solution, the usability of the solution, the security that is implemented, the exports capabilities of the solution, the capability to share reports and Hierarchy implementations and drill capabilities are also an important feature that could be judge if present in the solution

Jury

The jury is independent and for that reason the members are excluded from participating.

Presentation:

The afternoon of October 6th, the nominees present their project to the jury and audience.

Announcement winner BI-Award 2015

During the diner on October 6th the jury will announce the winner of the BI-Award
